# Design for life.

Appliances

## Rediscover the joy of cooking!

Life has many facets; individual requirements and situations determine the demands on the environment we create around us. As a premium brand for domestic appliances, Miele guarantees perfect culinary delights, and with this comes quality of life. With this claim in mind, we design our appliances.

# Welcome to Miele

## IMMER BESSER (forever better) - our pledge

When our two great grandfathers founded the Miele company, they had to make sure they stood apart from the competition in order to be successful. There are effectively only two ways of doing this: either by being cheaper than the rest or by being better than the rest. It is not really possible to be both at the same time.

They decided to be "better" than the rest.

Numerous best in class awards and certificates attest to the fact that Miele has continued to renew its commitment to being "immer besser" (forever better) throughout the past 115 years. However, the millions of satisfied customers around the world are perhaps the most important endorsement.

At the heart of this success lies a continuity of values and goals which are typically only found in companies which have been family-run for generations, rather than in businesses which are guided by the often short-term interests of the stock market.

It is in this sense that Miele has embodied first-class product quality and German engineering since 1899. Miele also stands in equal measure for respect, fairness and mutual esteem towards sales partners, customers, suppliers, employees and neighbours. Buying a Miele is an environmentally friendly decision. We ensure this by using methods of production that save resources as well by producing products which set new standards in terms of their consumption of electricity, water and detergent – and save you money at the same time.\*

As directors and co-proprietors of the fourth generation of our business we promise you that this will not change.

*Markus Miele*

# "IMMER BESSER" (FOREVER BETTER)

## Our brand promise

### **There are many good reasons for choosing Miele.**

Here are just six of them.

Since the company was founded in 1899, Miele has remained true to its "immer besser" (forever better) brand promise. This means that we will do all that we can to be "immer besser" (forever better) than our competitors and "immer besser" (forever better) than we already are.

### **Miele quality**

For more than 100 years it has been a proven adage that you can trust Miele and rely on our appliances. We are the only manufacturer in our branch of industry to test products such as our washing machines, tumble dryers, dishwashers and ovens to the equivalent of 20 years' use. Once a Miele, always a Miele: Miele customers around the world remain loyal to Miele and recommend Miele to others. Looking to the future, we promise not to entertain any compromises when it comes to the dependability and durability of our appliances.

### **Miele technology**

Miele stands for top-class results combined with minimum energy consumption. This goes for the hygienic and gentle care of your laundry, your flooring and your crockery as well as when conjuring up exquisite culinary delights. The key to this is a wealth of innovative features available only from Miele. This is borne out by numerous first places in leading product tests conducted around the world.

### **Miele convenience**

Whether using a conventional rotary switch, discreet sensor controls or a high-resolution touch display like the one on your smartphone: operating a Miele appliance is both easy and fun. Add to this a multitude of convenient and reliable automatic programmes and a great love of detail - success is guaranteed - on board both laundry and kitchen appliances. Make life easier for yourself with Miele!

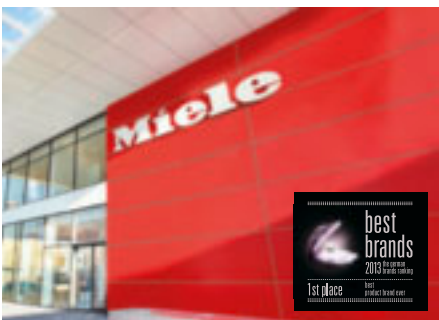

### **Miele design**

Miele believes in clean lines and timeless elegance. Nowhere else will you find such a comparable range of built-in kitchen appliances, with consistency in design lines and colour options, to suit the most diverse of interior designs and kitchen furniture fronts. Great care is taken to coordinate appliance design across the range. Whatever the style of your kitchen: Miele is the perfect match.

### **Miele Service**

Miele customers enjoy preferential treatment: Thanks to our fast and efficient after-sales service operation which has been voted best in its branch of industry many times over. Even if you need personalised instructions on appliance use or professional cleaning of your appliances, Miele will gladly make a home visit. We will always be there for you. That's a promise!

### **Miele brand**

In many countries Miele is the most coveted brand in its branch of industry. On its own home market in Germany, Miele was even voted 'best brand ever' in 2013, across all product branches. And the ownership of products from such a brand reveals much about its users: Miele customers have high expectations for the performance and the environmental friendliness of their domestic appliances. People who buy Miele are quality conscious and have style.

# Which design line suits you best?

## PureLine – space for the essentials

PureLine blends into the background, fitting in with the design of a modern kitchen where the focus is on using only few materials. The high proportion of glass in the PureLine design creates a calm and aesthetic appearance. Horizontal stainless-steel elements and an eye-catching handle which almost appears to be floating in front of jet black glass elements are characteristic features of these appliances.

Full-glass appliances in Obsidian Black, Havana Brown and Brilliant White follow the puristic approach of this design line perfectly.

# Precise controls and intuitive operation

## M Touch – Selection at the touch of a fingertip and alternative user interfaces

**DirectSensor:** selecting an operating mode with a single touch of one of the symbols positioned to the left of the display. Touch elements to the right of the display navigate the operator through the different levels.

**EasyControl:** controls are the same as the DirectControl user interface with one difference. Information such as temperature and time settings is provided in a 7-segment liquid-crystal display.

**EasySensor:** the minimalistic 7-segment display shows temperature and cooking time. Settings are selected and confirmed using integrated sensor-touch buttons.

Achieving results fast with an innovative touch display: the new displays are as simple to operate and self-explanatory as smart phones. This display enables you to operate the appliances fast and intuitively by using touch controls or swiping the display. Many functions can be selected at a touch of a button. The central display in white ensures perfect visibility of information. Flagship models feature multi-colour displays.

# Are you familiar with combination appliances from Miele?

A wide range of applications for baking, roasting, steaming and heating.

Miele built-in appliances are available as solo and as combination appliances.

Solo appliances have one function. These appliances, such as conventional ovens, steam ovens, microwave ovens and Gourmet warming drawers, are equipped with their relevant individual classic functions.

Miele combination appliances are ideal additions to a classic conventional oven. 45 cm high units in combination with a 14 cm high Miele Gourmet warming drawer fit perfectly in a 60 x 60 cm niche. This opens up untold cooking opportunities. A 60 x 60 cm steam combination oven is also available.

Combination appliances are also ideal for small kitchens. It is possible, for example, to accommodate operating modes of a conventional oven, microwave, steam oven and warming drawer, with their classic as well as with combination modes, in a tall cabinet with a niche height of 120 cm.

## Solo appliances

The conventional oven - an all-round talent

The steam oven - guarantor for healthy food preparation

The microwave oven - always ready for quick use

## Combination appliances

Conventional oven with microwave - compact and powerful

The steam combination oven - perfect in combination mode

Gourmet warming drawer - the perfect partner in your kitchen

Would you like to find out more? Detailed information is available from [www.miele-sustainability.com](http://www.miele-sustainability.com)

# Directly below the hob or at eye level

90 cm wide, 48 cm high

**Classic**  
60 cm wide, 60 cm high

**Extra-large:** 90 l

**Large-capacity:** 76 l

**Classic:** 56 l

### Cleaning systems

The food - simply delicious. But what about the cleaning? Miele offers two different cleaning systems which make cleaning extremely simple: PerfectClean and pyrolytic cleaning.

PerfectClean

Pyrolytic cleaning

Pyrofit

# Exclusive features for gourmet results

## Miele built-in oven product highlights\*

### **Exclusive to Miele** Moisture Plus

Each type of food has its own specific properties. Knowing them and making the most of them is the true art of cooking. In the past, the baker held the monopoly on baking perfect bread and rolls. Now you can too: with a Miele oven with Moisture Plus. Increasing the humidity in the oven optimises cooking of a variety of foods: soft, delicious-smelling bread with a shiny, appetising crust; bread rolls and croissants as if from the local baker; succulent, tender meat with a nicely browned crust, perfect oven bakes, delicious soufflés and so much more.

### **Exclusive to Miele** Wireless food probe

No supervision necessary: the countdown indicator provides precise information on when meat, fish or poultry is ready.

### **Exclusive to Miele** FlexiClip runners

Flexible and safe: you can baste or turn meat outside the hot oven without the risk of getting burned.

### **Automatic programmes**

Conjuring up over 100 dishes with ease: bread, cakes or meat – automatically regulated cooking process.

### **Exclusive to Miele** Special applications

For rarely used food preparation methods: user convenience with various special programmes such as drying fruit.

### **Exclusive to Miele** Crisp function

For a crispy finish: the use of dry heat when preparing pizza or french fries achieves better results.

# As individual as you

## Combination of two cooking functions on the smallest of footprints

The microwave combination oven combines the benefits of two powerful appliances into one, and fits into a 45 cm high niche: it is a fully-fledged oven with various operating modes including Fan Plus, and a powerful microwave.

You have the choice: you can use the functions separately, for example to bake delicious bread and cakes with the oven function or make a cup of hot chocolate with the microwave function. You can also use both functions together and save up to 30% time (compared to cooking without microwave power), depending on the dish.

# Exclusive features for gourmet results

## Microwave combination oven highlights\*

### **Exclusive to Miele** Stainless-steel cabinet with PerfectClean finish and linen-weave pattern

The cabinet of microwave combination ovens is made from stainless-steel with a linen-weave structure and PerfectClean finish. This surface finish makes it less susceptible to scratches and is considerably easier to clean than a conventional stainless-steel cabinet. The PerfectClean finish has excellent non-stick properties making it hard for soiling to stick to the oven interior during cooking.

### **Combination of microwave cooking modes**

Versatile and time-saving: by combining microwave energy with conventional heating methods you can save up to 30% time compared to cooking without microwave power.

### **Quick microwave**

Full power at your fingertips: fast selection of microwave function via a separate sensor control.

### **Automatic programmes**

Conjuring up over 100 dishes with ease: bread, cakes or meat - fully automatic food preparation.

### **Food probe**

Stress-free menu planning: the time remaining for the programme to run can be easily viewed; supervising the process is no longer necessary.

### **Exclusive to Miele** Popcorn button

At the touch of a button: fast and easy preparation of one packet of popcorn.

# Perfectly tailored to your requirements

## Miele steam oven niche dimensions, steam systems and technologies

### Models

#### Built-in steam ovens

Thanks to its compact size, a Miele steam oven can easily be integrated into your kitchen design. At 60 cm wide, it fits all standard niches, allowing you to choose the perfect location for yours.

### Niche dimension

#### Classic

60 cm wide, 45 cm high

### Designs

#### Steam ovens

Miele steam ovens operate without pressure in the temperature range of 40 – 100°C. Ideal for vegetables, fish, side dishes, desserts and much more.

### External steam generation

In contrast to other manufacturers' systems, the steam generators of all Miele steam ovens are situated outside the cabinets. This gives considerable advantages for the cooking process: ideal steam quantity, optimum temperature, quantity-independent cooking times as well as rapid heating-up. And because limescale cannot build up in the oven cabinet, cleaning is quick and easy.

#### MultiSteam

External steam generation for large cabinets.

# Exclusive features for gourmet results

## Steam oven product highlights\*

### Exclusive to Miele

#### MultiSteam

Perfection to suit personal tastes - the Miele steam oven is an all-round expert and the perfect partner for an oven and a hob. As the cooking durations for steaming and boiling are identical, you do not have to change your cooking habits. You can make starters, soups, fish, meat, vegetables, side-dishes or puddings individually or as a complete meal in one cooking process. Individual preferences for cooking results – firm or tender, juicy or dry – can also be catered for with the Miele steam oven. Thanks to Miele's MultiSteam technology, external steam generation ensures perfect results. 8 steam inlet ports enable fast generation of steam and steam distribution, short heat-up times and uniform cooking results.

### Exclusive to Miele

#### Large cabinet with plenty of space

Using the entire depth: cooking fish, vegetables and meat simultaneously and enjoying each one without the transfer of flavour.

### Exclusive to Miele

#### Automatic menu cooking

A complete menu: menu cooking automatically determines the temperature, cooking duration and sequence in which food is added.

#### Simple cleaning

No limescale: thanks to external steam generation cleaning is quick and easy.

#### Automatic programmes

Cook more than 150 types of food to perfection with ease: guaranteed results with fish, meat, vegetables and more.

### Exclusive to Miele

#### Keep warm function

Prevents food from cooling down: food is kept automatically at serving temperature for 15 minutes after the programme has finished.

\* depending on model

# Stunning perspectives for your kitchen design

## Miele combination steam oven design

### Design

Miele offers steam combination oven in one convenient design. With a Miele steam combination oven, you can look forward to delicious, healthy food.

The Miele 45 x 60 cm steam combination oven is the ideal addition to a conventional oven. In combination with a Miele 14 cm high Gourmet Warming Drawer, it fits into a 60 x 60 cm niche. This opens up untold cooking opportunities.

Would you like to find out more about drawers? Detailed information is available in the "Miele drawers" chapter.

### XL steam combination ovens

Miele XL steam combination ovens offer all the functions of 'steam only' ovens. They also feature all operating modes of a high-end conventional oven and, depending on the model, a food probe with or without a lead. Having additional combination options with moisture and a very large cabinet, the steam combination oven is a true all-rounder.

### External steam generation

In contrast to other manufacturers' systems, the steam generators of all Miele steam ovens are situated outside the cabinets. This gives considerable advantages for the cooking process: ideal steam quantity, optimum temperature, quantity-independent cooking times as well as rapid heating-up. And because limescale cannot build up in the oven cabinet, cleaning is quick and easy.

**Exclusive  
to Miele**

### MultiSteam

External steam generation for large cabinets.

# Exclusive features for gourmet results

## Steam combination oven highlights\*

### **Exclusive to Miele** MultiSteam

Perfection to suit personal tastes - the Miele steam oven is an all-round expert and the perfect partner for an oven and a hob. As the cooking durations for steaming and boiling are identical, you do not have to change your cooking habits. You can make starters, soups, fish, meat, vegetables, side-dishes or puddings individually or as a complete meal in one cooking process. Individual preferences for cooking results – firm or tender – can also be catered for with the Miele steam oven. Thanks to Miele's MultiSteam technology, external steam generation ensures perfect results. 8 steam inlet ports enable fast generation of steam and steam distribution, short heat-up times and uniform cooking results.

### **Exclusive to Miele** Fully fledged steam oven, conventional oven, steam combination oven

3 in 1: achieving perfect cooking, roasting and baking results with unlimited combination options.

### **XL cabinet**

Ample space: complete meals can be prepared simultaneously for up to 10 persons; sufficient room for poultry or a whole fish.

### **Exclusive to Miele** Motorised lift-up fascia panel

Convenient: the panel opens at the touch of a button to reveal the water container, condensation container and food probe.

### **Combination cooking**

Crispy on the outside, succulent on the inside: combination of, for example, moist and hot air for excellent baking and roasting results.

### **Exclusive to Miele** Wireless food probe

No supervision necessary: the countdown indicator provides precise information on when meat, fish or poultry is ready.

# As individual as you

## Miele microwave oven mode

### Model

#### **Miele built-in TopControl appliances**

Miele microwave ovens with controls positioned at the top offer excellent user benefits. Their design allows them to be installed in combination with any other Miele appliance in the kitchen - fleet design in perfection. The glass door opens downwards at the front – as on the ovens. As the controls are positioned conveniently at the top, more space is available for the cabinet.

### Niche dimension

**45 cm high  
60 cm wide**

### Operating modes

Whoever believes that microwave ovens are just for defrosting and reheating food can experience a culinary wonder with Miele appliances. Let yourself be surprised by the many possibilities that Miele microwave ovens can offer you in your everyday kitchen experience.

#### **Solo microwave ovens**

Warm a glass of milk, make jam, melt chocolate, cook vegetables, defrost fish, blanch almonds – a Miele microwave can do all this and much more in solo mode.

#### **Microwave ovens with integrated grill**

The integrated quartz grill will brown food after cooking quickly and conveniently. Or it can be used for roasting and grilling. It turns cheese-on-toast, vegetables or scampi into a crispy, grilled delicacy. Vegetable bakes can be perfected with a crispy baked cheese topping.

### User interface

**TopControl (EasyControl):** The desired wattage and temperature is selected classically by turning the left knob. Settings within the 7-segment LC-display are selected via the right control knob and entered via the sensor buttons.

### Range

**46 l cabinet**

# The right setting for every recipe

## The wide range of applications of Miele microwave ovens

### Starters

Small treats: a variety of starters are prepared in the microwave in no time at all

### Soups

A popular starter: All sorts of soups can be made in the steam oven for a tasty starter.

### Meat

Quick-change artist: Pork, beef, lamb or venison - meat dishes are absolutely no problem in the microwave.

### Fish

Fish is good for body and soul: Fish dishes are not only delicious but also healthy and very popular all over the world.

### Side dishes

Simply indispensable: potatoes, rice and pasta are an extremely nutritious and delicious part of any meal.

### Vegetables

Fresh and healthy: Vegetables can be cooked versatile and healthy.

### Sauces

Perfect addition: Only sauces complete the taste of a meal.

### Bakes

Unlimited combinations: Casseroles will never be boring with varying side dishes or sauces.

### Stews

Varied classic: Seasonal ingredients guarantee exceptional stews with and without meat.

### Desserts

Sweet temptations: The finale of a fine meal can be prepared in various ways in the microwave.

### Beverages

Warming from the inside: Depending on the mood drinks can be enjoyed classically or individually refined.

### Defrost

If it is urgent: delicate foods such as butter, cream or tender filet are quickly defrosted.

### Keeping warm function

For small delays: after cooking the food is automatically kept warm for up to 15 minutes.

### Reheating

Just as freshly cooked: food, beverages, baby food are heated at 450 - 900 W.

### Preserving

Always available: Preserving small portions of sweet or savory dishes in glasses up to 0.5 l.

### Jam

Sweet breakfast companions: especially small amounts of jam can be prepared particularly well in the microwave.

### Melting chocolate and butter

No burning or lumps: Chocolate and butter melt to perfection at 450 W.

### Proving yeast dough

Soft bread and delicious cakes: another talent the microwave oven has to offer – proving covered yeast dough at 80 W.

# Miele highlights for perfect results and more convenience

## The product highlights of Miele microwave oven

### XL cabinet

The spacious stainless-steel cabinet with TopControl operation can accommodate larger items and quantities, and cook, for example, roast chickens or oven bakes to perfection. The turntable with 40 cm diameter allows a particularly flexible use of different cooking containers or several containers, cups or plates simultaneously. Food preparation on a larger scale.

### 40 cm turntable

Plenty of space: perfect for several glasses, cups, plates or containers of various sizes.

### LED lighting

High-quality and durable: LEDs place your food in the limelight during preparation.

### Popcorn button

At the touch of a button: fast and easy preparation of one packet of popcorn.

### Quartz grill

Fast and uniform results: all dishes are browned perfectly in a short time.

### Automatic programmes

Conjuring up dishes with ease: simply select the appropriate programme and the weight of the food to be cooked - the appliance will do the rest.

# What do the icons mean?

## All symbols for microwave ovens at a glance

On the following pages all Miele microwave ovens are shown again in detail in tables. Basically Miele Products have many different functions and characteristics.

Icons of the most important features directly above the product ensure differentiation at a glance. For a faster overview we are giving you a brief explanation of all used icons in this product group on this page.

**User interfaces**

## Miele gourmet warmer drawer models

### Designs

Miele offers two built-in drawer models to suit various installation situations and niche sizes.

#### **Gourmet warming drawer - 14 cm or 29 cm high**

Alongside the benefits of a crockery warming drawer, the large Gourmet warming drawer also offers the options of keeping cooked food at serving temperature or, with the low-temperature function, can be used to cook meat and other food gently and perfectly.

### Range

#### **The classic drawer - 14 cm high, 60 cm wide**

Gourmet warming drawers are available in medium height. They can be combined perfectly with a 45 cm high compact appliance such as a Miele coffee machine, a steam oven, a steam combination oven or a microwave combination oven in a 60 cm niche. To enable you to install these drawers with various appliance designs, these drawers are offered in a choice of front designs.

#### **The extra-large drawer - 29 cm high, 60 cm wide**

The 29 cm high built-in Gourmet warming drawer is the largest drawer from Miele (also for pre-heating crockery). In combination with a conventional 60 cm high oven, it teams up perfectly in an 88 cm niche. This drawer is also available in two design versions to ensure a uniform appearance in your kitchen.

# Exclusive features for gourmet results

## Miele gourmet warmer drawer product highlights\*

### **Exclusive to Miele** Low-temperature cooking brings out the best in any type of meat

Low-temperature cooking is a professional method of food preparation giving high-quality, tender results with meat. Meat retains its aroma and nutrients exceptionally well and good chefs have been using this type of cooking method for many years to prepare tender food. It is now becoming increasingly popular in domestic households. Low-temperature cooking is stress-free as the cooking process does not require monitoring and other preparations can be carried out without any time pressure. And because the meat juices are evenly distributed during cooking, the meat can be carved straight after cooking without the need to rest it first.

### **4 operating modes**

Multi-purpose use: for warming cups and glasses, plates and dishes, for keeping food at serving temperature or for using the low temperature function to cook your food.

### **Exclusive to Miele** Touch controls

Simply convenient: programme selection is via a flush touch panel which is easy to clean.

### **Timer**

Heat guaranteed: all built-in food warming drawers feature a 4-hour timer which switches the appliance off automatically.

### **Automatic buffered self-closing feature**

Gentle and quiet: a special buffer allows the warming drawer to close gently.

### **Fully telescopic runners**

Simply practical: the drawer can be pulled out completely for easy loading and unloading.

\*depending on model

# Exclusive features for gourmet results

## Miele hob highlights\*

**Exclusive  
to Miele**

### DirectSelection Plus

This feature allows you to select power settings and times quickly and intuitively. Each cooking zone has its own back-lit numerical sensors which are not visible when the hob is switched off, for a discreet and elegant appearance.

**Exclusive  
to Miele**

### Con@ctivity

Innovative convenience: the cooker hood reacts automatically to settings on the hob.

### PowerFlex induction

Versatile and flexible: large cookware can also be heated quickly and easily.

### Flexible cooking zones

For all types of cookware: all types of pots and pans are suitable.

### Timer

Makes sense: this feature allows the user to, for example, set the minute minder.

### Stop & Go

Food cannot burn on: all cooking zones can be turned to power setting 1 at once at the touch of a button.

\*depending on model

Con@ctivity 2.0

# Which features are particularly important to you?

## The product highlights of Miele hobs

**Exclusive  
to Miele**

### Con@ctivity 2.0

Thanks to future-proof automatic Con@ctivity 2.0 you can concentrate on cooking. Apart from switching the cooker hood on and off, Con@ctivity 2.0 adjusts the hood's suction power automatically to what is happening on the hob below, guaranteeing a pleasant room micro-climate. The automatic Con@ctivity 2.0 function enables the cooker hood to communicate with the hob using RF technology. The installation is very simple as all cooker hoods with Con@ctivity 2.0 are supplied with a plug-in RF transmitter/receiver to be retrofitted on a Miele hob with Con@ctivity and can be retrofitted (Plug & Play).

**Exclusive  
to Miele**

### DirectSelection Plus

Fast and intuitive: Power levels and times can be individually and intuitively selected for each cooking zone using the numerical key bank.

### DirectSelection

So convenient: Selection of the different functions via a centrally located numerical key bank.

### PowerFlex

Versatile and flexible: Large cookware can also be heated quickly and easily.

### Versatile cooking zone designs

For all types of cookware: perfect for a wide variety of pans.

### Timer

Makes sense: this feature allows the user to, for example, set the minute minder.

\* Compared with a 15 year old Miele electric hob

# Perfectly tailored to your requirements

## Miele gas hobs designs

### Designs

#### Gas hobs

Miele gas hobs have onset controls and do not have to be installed above an oven. The space underneath the hob can be used, if wished, for drawers or cupboards, giving you more flexibility when planning your kitchen.

### Models

#### Gas hobs

Gas is a primary source of energy. Primary energy comes from natural, unrefined sources which can be used without conversion. That is why cooking with gas is particularly environmentally friendly. Cooking with gas has a long tradition. The first gas stoves and cookers started appearing on the market in the 19th century, long before electric appliances made their mark.

### Range

#### Large

90 cm extra wide hobs with 5 burners

#### Classic

60 cm wide hobs with 4 burners

### Designs

#### Classic –

gas hobs with stainless-steel trough

### Control technologies

#### Gas hobs without electronic controls

All Miele gas hobs sport the GasStop safety feature. In the event of flame failure, the gas supply is switched off immediately, preventing the continued supply of gas.

#### Elegant –

gas on glass

#### Gas hobs with electronic controls

QuickStart ensures fast ignition and GasStop&ReStart automatic reignition in the event of flame failure. Some hobs also feature a minute minder and a residual heat indicator.

# Exclusive features for gourmet results

## Miele hob product highlights\*

### Gas hobs with electronic controls

Miele gas hobs with electronic controls offer even more safety and convenience: QuickStart ensures fast ignition and GasStop&ReStart automatic re-ignition in the event of flame failure. Some of these gas hobs also feature a minute minder and a residual heat indicator.

### ComfortClean pot rests

Fast cleaning: simply remove the pot rests and clean them in a dishwasher. This results in gas hobs looking good for longer.

### Individual design

Attractive designs to suit all tastes: puristic stainless-steel look or elegant ceramic glass.

### Enamelled pot rests and burner parts

Nothing lasts longer and is easier to clean: enamelled cast-iron pot rests and burners with PerfectClean.

### QuickStart

No need to press or hold the control: convenient rotary electronic controls to switch burner on.

### GasStop & ReStart

Safe cooking: extinguished gas flames are automatically re-ignited. Should this prove unsuccessful, the gas supply is turned off immediately.

\*depending on model

# What do the icons mean?

### User interfaces

Indicates the type of controls installed.

Selection of functions and operating times is via control knobs.

### Security

Indicates the type of security features installed.

More convenience with automatic re-ignition in the event of flame failure.

High level of safety through immediate interruption of gas supply in the event of flame failure.

### QuickStart

Indicates if the appliance features QuickStart.

More convenience with faster ignition of gas flame.

### Pot rests

Indicates if the appliance has dishwasher-proof pot rests.

Perfect cleanliness ensure by cleaning dishwasher-proof pot rests.

# Perfectly tailored to your requirements

## Miele CombiSet range

### Designs

#### CombiSets

CombiSet elements can be installed in a kitchen worktop in a combination to suit you. Depending on model, the space below the CombiSet units can be used for drawers or cupboards instead of the oven, giving you more flexibility when planning your kitchen.

### Models

#### Conventional electric hobs

Cooking zones are heated by heater elements below the ceramic surface which glow red when active. Electric CombiSet hobs, just like traditional electric hobs, feature various cooking zone sizes.

#### Induction hobs

With induction cooking, the heat is generated directly in the pan base. The size of the pan is also recognised with the advantage that practically no energy is lost. Cooking is particularly safe as the areas surrounding the cooking zones stay relatively cool. Miele appliances also offer a number of high-end features for added user convenience.

#### Gas hobs

Powerful or gentle cooking: both are possible with a Miele gas hob. Available in a variety of widths with a range of features, the electronically controlled CombiSet gas burners also offer innovative safety features and user benefits.

### Range

Do you cook with only a few pans or do you like to conjure up lavish meals with lots of pots and pans? Miele offers two CombiSet appliance widths which can be combined to create your personal cooking space.

**Classic** – 288 mm wide

**Practical** – 380 mm wide

You can select the appliances that suit your requirements to create your personal cooking space and have sufficient space for your crockery.

# Cooking with the unusual

## Exotic cooking with Miele CombiSets

### Induction wok

The Miele wok pan fits perfectly into the depression of the ceramic hob which results in optimum heat distribution. The wok's intelligent ControllInduc® system reliably prevents overheating of oil and fat. The Miele induction wok offers special user benefits such as booster technology.

### Barbecue grill

Meat, fish or vegetables prepared on the grill are particularly tasty. Two separate grill zones with independent controls allow you to grill and keep food warm at the same time. Guaranteed to suit personal tastes: using the grill with water will make your food even more succulent. Using lava rock will give food the authentic aroma of an outdoor barbecue.

### TepanYaki

Food is cooked directly on the hot stainless steel surface. Miele's TepanYaki has two separate heat zones: this allows you, for example, to cook food with different heat requirements at the same time, or to cook at the front and keep food warm at the back.

### Deep fat fryer

If you love crispy, juicy specialities, then the deep fat fryer is for you. The 'temperature reached' indicator, shows when the target oil temperature has been reached, for safe preparation and optimum cooking results. This prevents the build-up of acrylamides. The deep fat fryer can also be used with water in the optional pasta insert for cooking your favourite pasta dish.

### Salamander grill

The salamander grill is a genuine all-rounder from the commercial kitchen. It is ideal for caramelising, gratins and browning toppings. Functional highlight: Miele's motorised salamander grill appears at the push of a button and disappears back into the worktop when no longer needed.

# Exclusive features for gourmet results

## Miele CombiSet product highlights\*

Miele CombiSet appliances emanate style and convenience. Despite each appliance working independently of the others, all look as if they go together. Installed next to each other, they create a uniform and elegant ensemble. A design highlight in any kitchen!

### Appliance widths

A wide range is standard: two different widths allow you to mix and match to suit your needs.

### Stainless-steel frame

Uniform frame design: no matter which CombiSet units are installed in combination, they always match each other perfectly.

### Knobs

Matching convenience: metal knobs complement the matching design of the CombiSet elements.

### Inclined control panel

Perfect look: the ergonomically arranged control panel simplifies operation.

### Indicators

Safe and effective: a display with up to three indicator modes.

\*depending on model

# The perfect micro-climate

## Miele cooker hood operating modes

During cooking, and in particular when frying, vapours are given off which consist of a mixture of steam, particles of fat and odours. If air in the room is not extracted or filtered, these vapours will remain in the room and affect the kitchen environment. Over a period of time this will affect the kitchen furniture, soft furnishings, paintwork etc. as this is where grease and vapours settle. There are two options for cleaning the air effectively: extraction mode and recirculation mode.

**Extraction mode** – highly efficient and dehumidifying

**Recirculation mode** – simple and efficient

Con@ctivity2.0

# Exclusive features for clean room air

## Miele cooker hood highlights\*

### **Exclusive to Miele** Con@ctivity – Automatic function for Miele cooker hoods

Achieving optimum extraction of kitchen vapours and odours and saving energy at the same time: a Miele cooker hood equipped with the Con@ctivity function does this automatically. Miele Con@ctivity enables the cooker hood to communicate with the hob. Information gathered from the hob is transmitted to the cooker hood. The cooker hood then uses this data to automatically select the correct fan setting to ensure the optimum room climate at all times. This leaves you free to concentrate fully on your cooking. You don't even have to worry about switching the appliance off with Con@ctivity. With the automatic run-on control, the cooker hood will switch off automatically after you have finished cooking so you do not use any more energy than is necessary.

**Exclusive to Miele** NoSmell active charcoal filter  
Efficient in absorbing odours: in recirculation mode odours are absorbed and neutralised completely.

**Stainless steel grease filters**  
Convenient cleaning: the high-quality metal grease filters are dishwasher-proof and extremely durable.

**Miele's acoustic package**  
Efficient and very quiet: the fan is effectively insulated with special soundproofing mats.

**Miele CleanCover**  
Protection and ease of cleaning: the smooth surface conceals and prevents contact with electrical components and the motor.

**High Power LED spotlights**  
Environmentally friendly and long lasting: with only 2 W, LED provides uniform lighting and produces a warm light.

# What do the icons mean?

## All symbols for cooker hoods at a glance

Charts on the following pages contain detailed information on Miele cooker hoods. In general, Miele products have many different functions and characteristics.

Icons of the most important features directly above the product ensure differentiation at a glance. For a faster overview we are giving you a brief explanation of all used icons in this product group on this page, using an example.

 **Energy efficiency**  
Indicates the energy efficiency rating.

 A+ to B energy efficiency ratings are displayed.

 **Con@ctivity 2.0**  
Indicates if the appliance features Con@ctivity 2.0.

 RF-based automatic function for an ideal room climate und excellent user convenience.

 **Silence**  
Indicates whether this appliance is particularly quiet.

 Particularly quiet in operation in the kitchen.

 **10 x filter**  
Indicates if the appliances has the 10-ply metal grease filter.

 10-ply metal grease filter, suitable for cleaning in a dishwasher.

 **Filter indicator**  
Indicates if the appliance features a filter saturation indicator.

 Optical saturation indicator for grease and active charcoal filters

 **Eco motor**  
Indicates if the appliances has an energy-efficient DC motor.

 Particularly efficient cooker hood

 **LED lighting**  
Indicates whether the appliance has LED lighting.

 For optimum illumination of the entire hob.

 **INDIVIDUAL**  
Indicates if the appliance is suitable for customisation.

 Modified cooker hood to suit requirements - customised solution possible

 **Hood in motion**  
Indicates if the appliance has a motorised canopy.

 The ideal canopy position for every work situation

## Coffee preparation systems

### Coffee bean machines

Would you like to be able to select your personal favourite amongst all types of coffee beans available on the market and enjoy the aroma of freshly ground beans? Then this is the system for you. You can adjust all machine settings to perfectly suit your beans and your taste.

### Coffee machine with Nespresso system

Do you prefer the Nespresso capsule system with a convenient choice of 16 portions of fresh coffee specialities? Do you love the idea of an uncomplicated first-class coffee machine which offers a selection of beverages and makes cleaning conveniently easy? Miele's Nespresso coffee machines with outstanding technology meets all these requirements.

# What type of appliance would you like?

## The wide variety of Miele coffee machines

### Designs

#### **Built-in coffee bean machines**

These machines fit perfectly into 45 cm high niches in tall units. In combination with other Miele built-in appliances – vertically or horizontally – they create a uniform appearance. These machines are also available as plumbed-in versions.

#### **Freestanding bean-to-cup coffee machines**

These compact Miele freestanding machines are at home anywhere in your kitchen, living room, conservatory, or wherever you want to enjoy aromatic fresh coffee at the push of a button.

#### **Built-in coffee machines with Nespresso system**

These machines can be built into any 35 cm high niches – in tall units, wall units or dresser units. They can be installed in combination with a 35 cm high steam oven and microwave oven.

### User interfaces

**M Touch:** Achieving results fast with the innovative touch display. This display enables you to operate the appliances fast and intuitively by directly touching the controls on the clear text display. Many functions can be selected by a single touch of a fingertip. The central display in white ensures perfect visibility of information, flagship models feature multi-colour displays.

**DirectSensor:** DirectSensor controls with modern touch functions offer maximum convenience. All control elements are clearly and concisely arranged around the clear text display; navigation is simple and intuitive. Select your preferred coffee speciality via one of the main symbols on the left; additional popular functions can be directly selected from a row of buttons below the display and from the touch elements to the right of the display.

# Miele highlights for perfect coffee enjoyment

## The product highlights of Miele built-in coffee bean machines

### OneTouch and OneTouch for Two

Fully-automatic perfection: preparation of one or two coffee specialities at the touch of a single button. The OneTouch for Two function allows two glasses of latte macchiato or two cups of cappuccino, coffee or espresso to be produced at the same time.

Using the OneTouch function and pressing the button twice produces two hot beverages in succession in one process. Hot beverages are delivered conveniently via the central spout unit. Glasses and cups no longer need to be moved around.

### AromaticSystem

Intensive coffee aroma: intelligent technology to achieve best possible results.

**Exclusive  
to Miele**

### CupSensor

Ideal distance: the unique CupSensor recognises the rim of the cup and alters the position of the central spout accordingly.

**Exclusive  
to Miele**

### EasyClick milk system

Innovative and only available from Miele: the convenient milk system simply clicks into place at the front and is easily removed.

**Exclusive  
to Miele**

### Automatic rinsing of milk lines with water from the water container

Excellent user convenience: after the preparation of coffee specialities with milk, the appliance is automatically rinsed.

**Exclusive  
to Miele**

### ComfortDoor\* - patented door system with wide-opening hinged front

Easy access: convenient access to bean container, water container, grounds container and drip tray.

### OneTouch and OneTouch for Two

Fully-automatic perfection: preparation of one or two coffee specialties at the touch of a single button. The OneTouch for Two function allows two glasses of latte macchiato or two cups of cappuccino, coffee or espresso to be produced at the same time. Using the OneTouch function and pressing the button twice produces two hot beverages in succession in one process. Hot beverages are delivered conveniently via the central spout unit. Glasses and cups no longer need to be moved around.

### AromaticSystem

Intensive coffee aroma: intelligent technology to achieve best possible results.

### Automatic rinsing of milk lines with water from the water container

Excellent user convenience: after the preparation of coffee specialties with milk, the appliance is automatically rinsed.

### Cappuccinatore

Minimum effort required: hot milk or creamy milk froth is delivered straight to the cup, glass or small coffee pot.

### Easily removable brew unit

Easy to remove and clean: a guarantee for impeccable hygiene, longevity and perfect coffee enjoyment.

### ComfortClean

Thorough cleaning and value retention: many components are dishwasher-proof.

# Miele highlights for perfect coffee enjoyment

## The product highlights of Miele built-in coffee machines with Nespresso system

### Exclusive to Miele

#### Built-in coffee machines with Nespresso system

With this built-in coffee machine from Miele, espresso, cappuccino, latte macchiato, etc. can be conveniently prepared from Nespresso capsules. 16 different types are available for you to enjoy: from intensive to mild, from fruity to spicy. With the Nespresso system, the coffee is sealed inside a capsule. Every capsule guarantees full flavour at consistently high quality - cup for cup.

#### Cappuccinatore

Minimum effort required: hot milk or creamy milk froth is delivered straight to the cup, glass or small coffee pot.

### Exclusive to Miele

#### Capsule chute

Select your favourite coffee from up to five Nespresso types at the touch of a button: the unique electronic carousel has room for 20 capsules in 5 hoppers.

### Exclusive to Miele

#### ComfortDoor\* - patented door system with wide-opening hinged front

Easy access: convenient access to bean container, water container, grounds container and drip tray.

#### ComfortClean

Thorough cleaning: many components are dishwasher-proof.

#### User profiles

Your choice: up to 10 individual user profiles for your personal coffee experience.

# What do the icons mean?

## All symbols for built-in coffee machine at a glance

Charts on the following pages contain detailed information on Miele built-in coffee machines. In general, Miele products have many different functions and characteristics.

Icons of the most important features directly above the product ensure differentiation at a glance. For a quick overview you will find on this page a short explanation of all symbols used.

### User interfaces

Indicates the type of controls on the fascia panel.

Intuitive control with a fingertip, multicolour display

Direct selection of beverage specialties via touch sensors, 4-line text display

### Preparation system

Explains whether the appliance uses beans or capsules

This allows particularly intense mixing of ground coffee and water, and the coffee aroma can unfold even better.

Coffee machines with Nespresso capsule system

### OneTouch for Two

Indicates whether the appliances features the OneTouch for Two function

Two delicious coffee specialties at the same time by simply touching a button.

### ComfortDoor

Explains if the appliance has a door system which allows the door to be opened fully.

Convenient access to the removable water container, drip tray and coffee grounds container.

### EasyClick

Indicates if the appliances features the EasyClick milk system function

Simple removing and replacing of the milk system at the front.

### Cup sensor

Indicates if the appliance detects the cup rim automatically

Recognises the height of the cup and positions the central spout accordingly.

### Cleaning Programmes

Indicates if the appliance has various cleaning programmes

Convenient: Cleaning programmes for perfect hygiene and to ensure a long life cycle

### Water connection

Indicates if the appliance can be plumbed in.

Appliance can be switched to fixed water connection

### WarmCup Connection

Indicates if the appliance can be connected to a crockery warming drawer

Connection for a crockery warming drawer below the CVA6000 for warming cups for a perfect crema

# Which appliance is the one for you?

## The wide variety of Miele refrigerators, freezers and wine units

### Appliance range

#### Refrigerators

Miele refrigerators are designed to keep your groceries fresh in an efficient and well organised way. Intelligent PerfectFresh compartments guarantee that food is kept fresh expertly. Choose „Your Miele“ from a wide range of appliances including integrated appliances from 72 cm to 178 cm high and freestanding appliances from 85 cm to 200 cm high.

#### Fridge-freezers

These appliances offer plenty of storage space for fresh food and also for frozen food, each section with its own door. Miele fridge-freezer combinations combine convenient, gentle storage of fresh food as well as frozen food in one appliance.

#### Freezers

Miele freezers are powerful and efficient, and exemplary in terms of organisation and functionality. They can be set up as stand-alone appliances or combined with a matching Miele refrigerator. The design is characterised by a puristic, timeless style. Its inner values convince, for example, with a freezing temperature that can be regulated down to -26°C.

#### Wine units

Miele wine units provide the optimum storage conditions for your wine collection. With individually controlled temperature zones for different types of wine, your reds and whites are guaranteed professional treatment. Not only does a Miele wine conditioning unit provide the best storage conditions for your wine, it will also look the part in your home.

#### MasterCool

MasterCool is a unique range of large-capacity built-in refrigerators and freezers! Enjoy superior design and perfect functionality: each and every detail has been honed to meet the exacting requirements of your everyday food storage needs. Using only the very best materials, this range reflects quality.

### Designs

#### Freestanding

An eye-catcher for your kitchen

reddot design award  
winner 2015

#### Built-in appliances

Perfect integration into your kitchen design

#### Built-under appliances

Offer ample space in small kitchens

## User interfaces

### TouchControl operation

Miele TouchControl is focussed on design. All key features look the same, which achieves a perfectly matching design in line with other Miele built-in appliances. Main functions can be selected quickly via TouchControl. All other functions are selected via the display.

### PicTronic

PicTronic controls also have convenient light-touch switches. The temperature is displayed in a black screen.

### ComfortControl operation

ComfortControl allows the convenient setting of temperature, automatic SuperCool or buzzer via light-touch switches. LEDs indicate the temperature.

### Manual temperature control

The temperature is set via a manual temperature control which is as easy to use as it always has been.

# Which freshness system would you like?

Pure enjoyment and natural taste with PerfectFresh and PerfectFresh Pro

## Food is bought fresh, and then...?

Fresh food is the basis for wholesome, healthy living. Fruit and vegetables should be consumed as crisp and fresh as when purchased. But who has the time nowadays to buy fresh ingredients every day?

Apart from the quality of the food at the point of purchase, the right storage conditions are also important. The storage conditions determine how fresh, tasty and healthy food still is when preparing it for consumption. The solution: PerfectFresh and PerfectFresh Pro.

## PerfectFresh

PerfectFresh is the synonym for innovative food storage at Miele: A special cooling zone in Miele refrigerators which offers ideal storage conditions for a variety of food. Many types of fruit and vegetables, meat, fish and dairy products remain fresh for considerably longer in the PerfectFresh zone than in a conventional refrigerator. At a temperature of between 0°C and 3°C, as well as ideal air-humidity levels, even perishable food can be stored in ideal conditions and retain its freshness.

## PerfectFresh Pro

Through intensive research, Miele succeeded in developing the PerfectFresh freshness principle even further. The result: PerfectFresh Pro. PerfectFresh Pro keeps fruit and vegetables fresh for even longer and therefore meets the highest of demands. This is achieved with an innovative compartment cover with Miele's special perforations. It maintains the climate inside the humidity-controlled compartment excellently.

#### Dry compartment:

In the PerfectFresh dry compartment, meat, fish and almost all milk products are stored at ideal storage conditions: the temperature is maintained between 0°C and 3°C. When stored in the dry compartment, food can be consumed even after the best before date.

#### Humidity controlled compartment:

The PerfectFresh humidity-controlled compartment has been designed specifically for storing fresh fruit and vegetables which require high humidity levels for perfect storage conditions. A storage temperature between 0°C and 3°C as well as a humidity level of up to 90%\* ensure that your food remains fresh considerably longer.

# Efficiency and sustainability

Saving energy the environmentally friendly way with Miele refrigerators and freezers

Miele refrigerators and freezers achieve top ratings. With its current refrigeration products, Miele demonstrates that high performance and energy-saving can be achieved simultaneously. Miele invests a great deal in the continuous development of modern technologies such as the optimisation of the refrigeration circuit and insulation. With success, as the majority of appliances clearly exceed the A+ energy-efficiency classification.

For you, the savings on appliances with energy-efficiency rating of A+ compared with an A appliance is 20%. Appliances with energy-efficiency rating A++ consume at least 40% less energy and A+++ models even 60% less energy than a comparable model with an energy-efficiency rating A. All Miele refrigeration appliances enjoy being top of their class and set standards in terms of environmental friendliness. Even Miele's flagship appliances are extremely economical. With an appliance which is in use 24 hours a day, every day over many years, this benefit goes straight to your pocket and is gentle on the environment. Miele refrigerators and freezers are always an excellent choice – for your home and the environment.

# Miele MasterCool

## Design and technology on large capacity flagship appliances

With the development of the large capacity MasterCool appliances, Miele sets new standards. High-end design, impressive innovations and inimitable convenience features are combined in top of the range refrigeration appliances. With MasterCool you can experience pleasure and convenience on a whole new level.

Impressive look

Unsurpassed quality

Design at its best

114 Maximum convenience

Variety on a large scale

# Miele wine conditioning units

Wine storage with style and many highlights\*

For true connoisseurs, the enjoyment of wine begins with the selection of the wine itself. The length of time you can enjoy its rich flavour depends upon how it is stored at home. The correct storage conditions of wine have a direct effect on its shelf life. A wine unit from Miele offers ideal conditions for the storage of finest wine.

Optimum temperature control

Highest flexibility

Particularly eye-catching

\*Features depend on model

# Protection against condensation

## **First-ever Miele Humidity Range – Specifically developed for hot, humid climates**

During periods of high humidity, the relative humidity in Singapore and its neighbouring countries estimates up to a monthly averages of 84%. Under these conditions, condensation may appear on exterior surfaces of cooling appliances. Fridge-freezers of the Humidity Range in combination with Humidity Kits currently represent the most effective system against condensation on the market. Miele is proud to be the first company to introduce the humidity solution for cooling appliances.

## **Humidity Range – Features & Benefits**

The new appliances from the Humidity Range are fitted ex works with front-frame and side-panel heaters. These prevent condensation on the surfaces, which is bound to occur at high temperatures and high levels of relative humidity of up to 85 – 90%. The results: The unit itself is kept dry as well as protection of adjacent cabinetry.

- No condensation on fridge-freezer's side walls and front frames
- Minimal care and cleaning
- Protects kitchen furniture

## **Model of Humidity Range:**

Integrated fridge-freezer KFN 9753 iD, KFNS 37232 iD and KFNS 37432 iD

## **Humidity Kits – Retrofittable protection against moisture**

Humidity Kits are the perfect complement to the models of the Humidity range: These kits are fitted to the fridge-freezer doors and prevent the formation of condensation on their surfaces. Humidity Kits are attached to the appliances using special adhesive foil and ensure that the outer door panel is gently heated. In doing so, Humidity Kits are able to prevent condensation on door surfaces even at levels of relative humidity of 85 – 90%. Humidity Kits for the doors can simply be retrofitted at any time by Miele professional technicians. If the appliances and Humidity kits are ordered at the same time, the kit will be installed prior to delivery complimentary.

## **Models of the Humidity Range (ex works with front-frame and side-panel heater), which can be fitted with additional Humidity Kits on door panels:**

Integrated fridge-freezer KFN 9753 iD, KFNS 37232 iD and KFNS 37432 iD

N.B. At a relative humidity of above 90 %, slight condensation on appliances may still occur.

The same applies if rooms are not properly ventilated or air-conditioned. In general it is advisable to install the appliances with sufficient ventilation in a dry and/or air-conditions room.

Please ensure that doors always close properly. For more information please see also our installation recommendations on the last pages of this brochure.

# Miele highlights for perfect results and more convenience

The product highlights\* of Miele refrigerators, freezers and wine conditioning units

## PerfectFresh

Apart from the quality of the food at the point of purchase, the right storage conditions are also important. The storage conditions determine how fresh, tasty and healthy food still is when preparing it for consumption. This is easily achieved with PerfectFresh – perfect storage conditions for fresh produce to retain vitamins, nutrients and flavours for longer!

**Exclusive  
to Miele**

## FlexiLight

Perfect glare-free lighting: depending on the food stored, the interior lighting can be positioned at all rack levels.

## NoFrost

Convenient: manual defrosting no longer necessary. Cooled air is circulated and prevents the formation of ice on food.

## DynaCool

Uniform distribution of temperature: a ventilator ensures excellent circulation and distribution of cold air.

**Exclusive  
to Miele**

## ComfortClean

Fast cleaning: the high-quality door racks are dishwasher-proof.

**Exclusive  
to Miele**

## VarioBord

From the fridge straight onto the table: the versatile VarioBord shelves are very easy to take out of their holders and to insert again.

\* Features will vary depending on model

# What do the icons mean?

## All symbols for fridge-freezers at a glance

Charts on the following pages contain detailed information on Miele's fridge-freezers. In general, Miele products have many different functions and characteristics.

Icons of the most important features directly above the product ensure differentiation at a glance. For a quick overview you will find on this page a short explanation of all symbols used.

 **Energy efficiency**  
Indicates the energy efficiency rating.

 A+++ to A+ energy efficiency ratings are displayed.

 **Freshness system**  
Indicates the freshness system.

 PerfectFresh: Food stays fresh up to three times longer

 PerfectFresh Pro: Professional storage - freshness up to five times longer

 MasterFresh: Ideal climate for your food - exclusive to MasterCool appliances

 **Lighting**  
Explains which lighting the appliance has.

 LED lights: Maintenance-free, save energy and provide optimum illumination of the interior compartment

 FlexiLight: Illuminates with no glare and can also be individually positioned on any shelf level in various ways

 BrilliantLight: Powerful LEDs ensure a perfect illumination of the interior - exclusive to MasterCool appliances

 **NoFrost**  
Indicates whether the appliance defrosts automatically.

 Circulating cool air makes defrosting no longer necessary

 **DynaCool**  
Indicates whether the appliance offers uniform air circulation

 Ensures uniform circulation of cold air in the refrigerator

 **ComfortClean**  
Indicates whether parts of the refrigerator are dishwasher safe.

 Door rack for bottles dishwasher safe up to 55°C

 **SoftClose**  
Indicates whether the appliance features a soft door closing system.

 Soft closing prevents movement of bottles stored in the interior door

 **SelfClose**  
Indicates whether the compartments are fitted with a self-closing mechanism.

 The PerfectFresh compartments have a soft self-closing feature

 **IceMaker**  
Indicates whether the appliance features an ice cube maker.

 Ice cube maker with water tank or fixed water connection for a quick and easy production

# Perfect design harmony in your kitchen

## Miele dishwasher models

### Models

#### Miele dishwasher models

##### Freestanding dishwashers

Freestanding dishwashers with a hard-wearing laminate worktop. As these units are not built in, they can simply move house with their owners and be installed in the new kitchen.

##### Integrated dishwashers

Appliance fronts and fascias are designed to take front panels to match kitchen furniture. Alternatively, front panels in stainless-steel with CleanSteel finish are also an option.

##### Fully integrated dishwashers

The entire front of the appliance is concealed either behind cabinet panelling or a Miele front made from stainless steel with CleanSteel finish. This allows dishwashers to blend in unobtrusively with the design of the kitchen.

### Range

#### Miele dishwasher sizes

##### Standard dishwashers

(81 cm high, 60 cm wide)

This is the standard niche dimension available in the majority of households, from 81 cm built-under height.

##### XXL dishwashers

(85 cm high, 60 cm wide)

Built-under, integrated and fully integrated dishwashers from Miele are also available as XXL models. They are suitable for kitchens with 85 cm built-under height. 4 cm of additional depth in the upper basket offers even greater flexibility and more loading options for example for stemware or large coffee mugs.

# Tested for the equivalent of 20 years' use\*

## The quality tests of Miele dishwashers

Quality is very high on Miele's agenda. That is the reason why special demands are placed on production and the materials used. All Miele dishwashers are also tested for the equivalent of 20 years' use\*.

### Performance test

In addition to cleaning and drying results, the acoustic values and consumption values for each programme are measured against the high Miele quality pledge in a performance test.

### Basket load test

To create realistic test conditions, baskets are heavily laden: 3 kg in the 3D cutlery tray, 10 kg in the upper basket and 20 kg in the lower basket. Under these extreme loads, baskets are automatically pulled out and pushed in 100,000 times.

### Door endurance test

During the long life of an appliance the dishwasher door in particular is subjected to considerable strain. An endurance test simulates this strain: with a special device the dishwasher door is opened and closed automatically 100,000 times.

### The impact test for cutlery basket

The impact test enables Miele to ensure that the cutlery basket can withstand the strain of everyday use: the cutlery tray is loaded with test cutlery (14 cutlery sets of 4 pieces each) and drops onto a hard surface from a height of one metre.

## Ecological responsibility

At the heart of everything we do

The responsibility for our environment has long been a tradition at Miele for more than 110 years. Our natural environment is the foundation of our existence which we want to protect - for us and generations to come to have a good future. True to our motto "Immer besser" (forever better), we develop domestic appliances for customers which reduce the burden on the environment and on natural resources. This begins with the selection of materials, ensuring efficient production and ends, after a long machine life, in environmentally friendly recycling.

Our environmental philosophy pays off: Miele's highly efficient domestic and built-in appliances ensure excellent performance and set standards in terms of low water and electricity consumption values too.

### Energy label for Miele dishwashers

The different power levels and consumption rates are readily apparent on the European energy label. Here the energy and water consumption per year for dishwashers is to be found, and the standby consumption is included in the calculation. The values per rinse are listed as usual in the declaration.

- The best energy efficiency class is A+++ and the highest drying performance class is A.
- With sound values of 41 dB(A) Miele dishwashers are among the quietest on the market.

### Hot water connection

All Miele dishwashers also have a hot water connection up to 60°C. In the 'Sensor wash gentle' programme, this reduces electricity consumption by up to 50% and running times by up to 10%. In the ECO programme, energy consumption of a dishwasher is reduced by up to 0.49 kWh.

# Miele highlights for perfect results and more convenience

## The product highlights of Miele dishwashers

**Exklusiv  
bei Miele**

### Patented<sup>1)</sup> 3D cutlery tray

An innovation from the inventor of the cutlery tray: Miele's intelligent 3D cutlery tray can be adjusted in three directions and adapts perfectly to various load arrangements. This allows awkward items such as whisks and soup ladles to be accommodated and gently washed.

Adjusting the side sections of the cutlery tray allows tall stemware to be held securely in the upper basket. No need to take the side sections of the drawer out!

**Exklusiv  
bei Miele**

### Knock2open<sup>2)</sup>

Unique: this appliance can be perfectly integrated into handleless kitchens – the door opens automatically by tapping lightly twice.

### Highest level of energy efficiency

Best performance with A+++: highly economical, producing excellent cleaning and drying results.

### Freshwater dishwashers with water consumption from 6.5 l

From as little as 6.5 l water consumption: best cleaning results combined with minimum water consumption in the Automatic programme.

**Exklusiv  
bei Miele**

### BrilliantLight<sup>3)</sup>

Automatically controlled: 4 LEDs immerse the entire dishwasher interior in brilliant light.

**Exklusiv  
bei Miele**

### Patented<sup>4)</sup> AutoOpen drying

Everything perfectly dry: the dishwasher door opens automatically at the end of a programme cycle.

# What do the icons mean?

## All symbols for freestanding, built-under and integrated dishwashers at a glance

On the following pages all Miele freestanding, built-under and integrated dishwashers are shown again in detail in tables. In general, Miele products have many different functions and characteristics.

Icons of the most important features directly above the product ensure differentiation at a glance. For a quick overview you will find on this page a short explanation of all symbols used.

 **Energy efficiency**  
States energy efficiency rating

 A+++ to A+ energy efficiency ratings are displayed

 **Water consumption**  
States the water consumption in litres

 The most economical dishwashers use only 6.5 litres in the Automatic programme. The highest value is 13.5 litres.

 **Sound emissions**  
States sound emissions in decibels (dB)

 The quietest dishwasher has sound emissions of only 38 dB. The highest value is 46 dB.

 **Cutlery cleaning**  
States where the cutlery can be placed for cleaning

 The patented 3D cutlery tray<sup>5)</sup> can be adjusted in three directions - width, depth and height.

 Every item of cutlery is separated, food deposits are completely removed and the cutlery dried perfectly.

 The cutlery basket fits in any position over the front spikes in the lower basket.

 **Starting option**  
Shows the starting option of the appliance

 Set your dishwasher to start up to 24h in advance

 Enables a flexible programme start using variable electricity tariffs provided by utility

 **Perfect GlassCare<sup>1)</sup>**  
Shows if the appliance features Perfect GlassCare

 This patented technology ensures that your glasses are cleaned gently

 **AutoOpen drying<sup>2)</sup>**  
Shows if the appliance has AutoOpen drying

 The dishwasher door opens automatically at the end of a programme cycle.

 **In-door salt container<sup>3)</sup>**  
Shows if the salt container is inside the door

 Convenient refilling the salt with door half-open

 **BrilliantLight<sup>4)</sup>**  
Shows if the appliance is illuminated from the inside

 4 Power LEDs for perfect illumination of the inner cabinet

# What do the icons mean?

## All symbols for fully integrated dishwashers at a glance

Charts on the following pages contain detailed information on Miele's fully integrated dishwashers. In general, Miele products have many different functions and characteristics.

Icons of the most important features directly above the product ensure differentiation at a glance. For a quick overview you will find on this page a short explanation of all symbols used.

### Energy efficiency

Shows the energy efficiency rating

A+++ to A+ energy efficiency ratings are displayed.

### Water consumption

Shows the water consumption in litres

The most economical dishwashers consume only 6.5 litres in Automatic programme. The highest value is 13.5 litres.

### Sound emission

Shows the noise level in decibels (dB)

The quietest dishwashers have noise level of only 38 dB thanks to the 'ExtraQuiet' dishwashing programme. The highest value is 46 dB.

### Cutlery loading

Shows where the cutlery can be placed for cleaning

The height, width and depth of the patented 3D cutlery tray<sup>1)</sup> can be adjusted.

Every item of cutlery is separated, food deposits are completely removed and the cutlery dried perfectly.

The cutlery basket fits in any position over the front spikes in the lower basket.

### Starting option

Shows the starting option of the appliance

Set your dishwasher to start up to 24h in advance

## CombiSets Installation

Worktop cut-out: 2 Appliances

When installing , the width of the cut-out required D is calculated by adding the widths of appliances A & C and deducting 16 mm from this figure.

Worktop cut-out: 3 Appliances

When installing three appliances, the width of the cut-out required D is calculated by adding the widths of appliances A, B and C and deducting 16 mm from this figure.

# Ecological responsibility

At the heart of everything we do

## Sustainability - assuming responsibility for our environment

Responsibility for generations - there is no better way of expressing how Miele defines sustainability. For more than 115 years we have been developing and producing high-performance and convenient domestic appliances which are peerless in terms of durability and dependability, resource-saving production and energy-efficiency. Our products are produced by employees who are respected and valued. We ensure that our supply chain complies with social and environmental standards. With the people and institutions who are involved in Miele activities we maintain a dialogue with a spirit of partnership.

This stance is affirmed with a membership with the UN sustainability organisation Global Compact, with certification according to SA 8000 valid international social standards, and by joining the "Diversity Charter" for equal opportunities amongst employees. Certification according to ISO standards for quality, environment and energy management and, according to standards for health and occupational safety, offer a systematic frame for further optimisations: in the environmental protection in production and products and in the protection of our employees. All in keeping with our motto of being "Immer besser" (forever better), which was inscribed by the founding fathers of Miele in their first machines.

Miele holds sustainability in the same esteem as integrity, respect towards our natural environment which is the foundation of our existence, responsibility for people and the environment, continuity and quality consciousness. For all this our company was awarded the German Sustainability Prize 2014 and an environmental awareness prize B.A.U.M. Umweltpreis 2014 (A German working group to promote environmental awareness at a managerial level).

# Miele quality

## Forever better

Miele stands for quality, innovation and internationally recognised product developments. Miele is a worldwide established premium brand and highly valued. The foundation for this success was laid by the founders Carl Miele and Reinhard Zinkann. With their guiding motto of being 'Forever better', still valid to this day, they condensed the company's corporate philosophy to: "Success can only be had in the long run if one is totally and utterly convinced of the quality of one's products." The family-run Miele company has always kept this promise during the 110-year history of the company and, in doing so, has helped to achieve a unique position worldwide within its branch of industry.

### Quality

First-class technology, best functionality and excellent durability – these values define Miele products as real premium appliances. Since the company was founded, Miele has been proving its competence with regard to perfect domestic appliances and hygiene. Miele appliances are highly reliable. This claim is endorsed by our in-house laboratory tests and then over many years in your home.
